

Lab # 10
IICT BS DS Fall 2022

Task 01: Formatting document

[20 marks]

HTML THE HARD WAY

I stand by my method of teaching HTML the old-fashioned way—*by hand*. There's no better way to truly understand how markup works than typing it out, one tag at a time, then opening your page in a browser. It doesn't take long to develop a feel for marking up documents properly.

Although you may choose to use a web-authoring tool down the line, understanding HTML will make using your tools easier and more efficient. In addition, you will be glad that you can look at a source file and understand what you're seeing. It is also crucial for troubleshooting broken pages or fine-tuning the default formatting that web tools produce.

And for what it's worth, professional web developers tend to mark up content manually because it gives them better control over the code and allows them to make deliberate decisions about what elements are used.

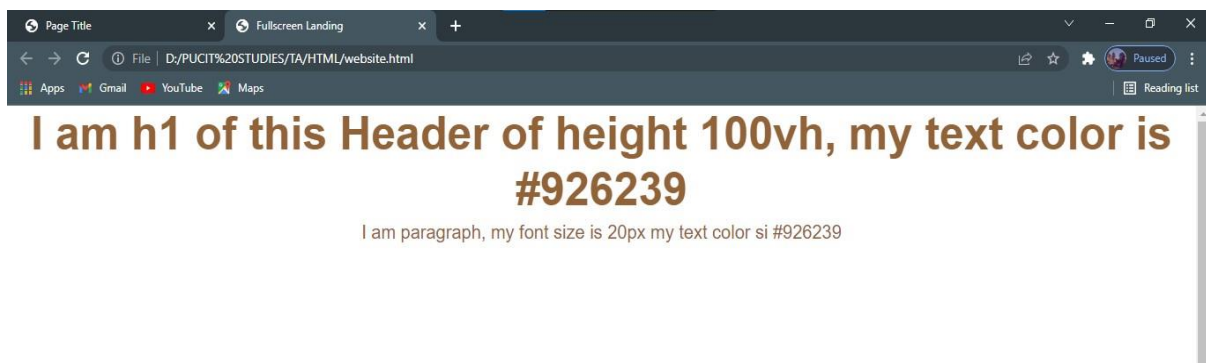

Open Text editor, starting coding this document. Check the output step by step in the browser by saving file with .html extension.

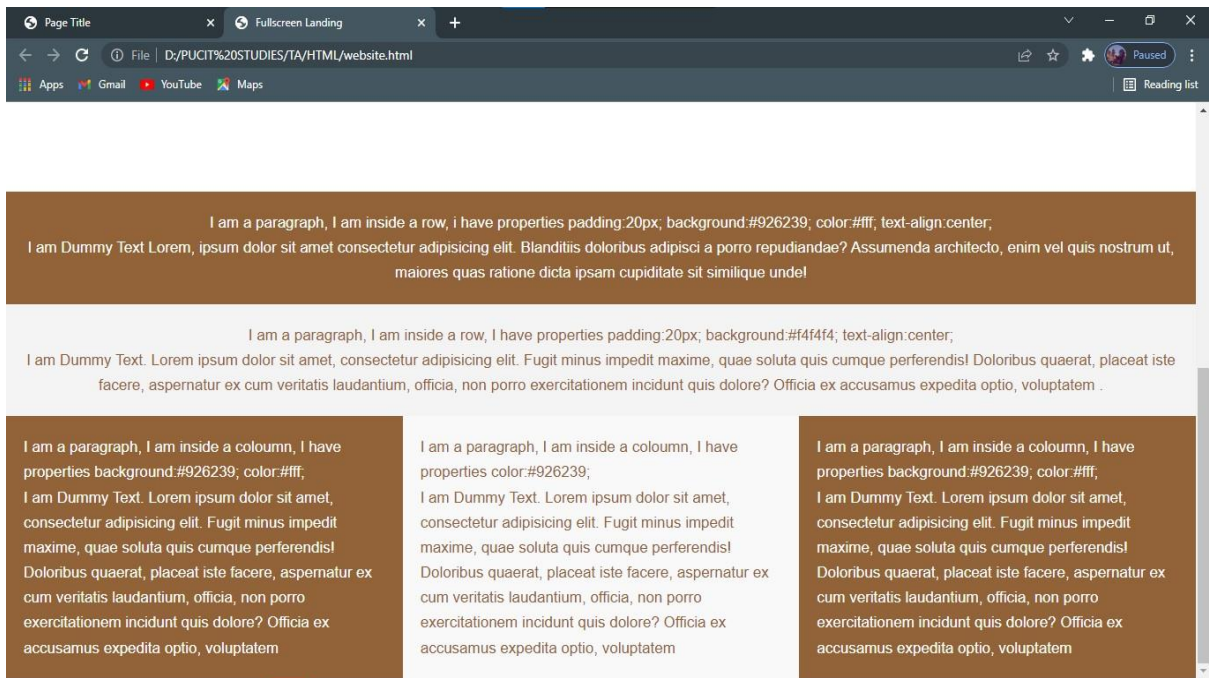

Store the file with name **“Task1_rollno.html”**.

Task 02: Formatting Text and Web Pages

[20 marks]

See the templates. Make the web page which should look like this.

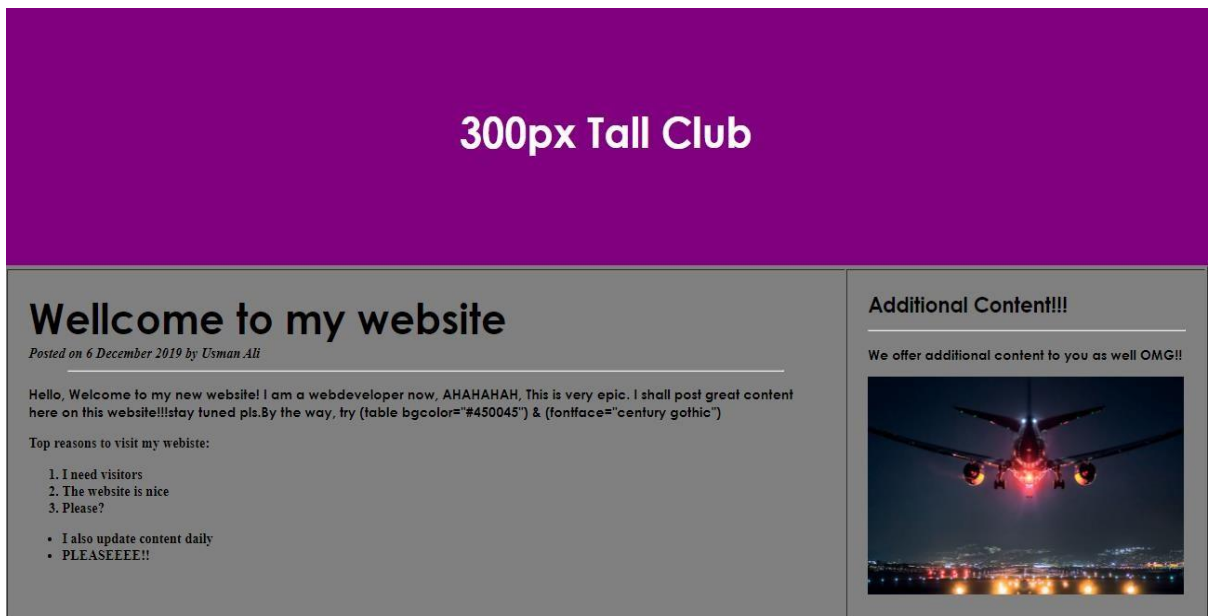

Open Text editor, starting coding this document. Check the output step by step in browser by saving file with .html extension.

store the file with name “**Task2_rollno.html**”.

Task 03: Develop a Web Page

[60 marks]

This is template of web page you have to make. You can use table tag for adjusting components of this webpage.

Open Text editor, starting coding this document. Check the output step by step in browser by saving file with .html extension. Store the file with name “**Taks3_rollno.html**”.
